

Free Chlorine Message

City of Lebanon will be switching from chloramines to a free chlorine residual for approximately 6 weeks. Dialysis patients should be aware that the free chlorine is in use. During this period, you may experience a chlorine taste and odor. The City will also flush hydrants during the free chlorine period. You may experience low water pressure and water discoloration during flushing.

Please call 618-537-4976 with questions. Thank you.
